

GM Free Food in Australia – URGENT

GE - Genetically Engineered Crops/Food, GM - Genetically Modified Crops/Food, GMOs - Genetically Modified Organisms.
(These terms mean the same thing)

**IF THEY CAN AFFORD TO TAMPER WITH OUR FOOD THEY CAN AFFORD TO LABEL IT!
ASK YOUR FOOD STORE FOR THEIR GM FREE SELECTION.**

Over **100 dead** and **thousands** have been hospitalised in North America from eating GM products. The US and Canada cannot sell GM produce on the world market.

Should we plant GM and join North America's folly?

Europe and Japan will refuse our produce if it is GM.

Ask your politicians. When Australians die from anaphylactic shock (extreme allergic reaction), because of GM products - **"Who Will Be Guilty?"**

We need all of our imported foods labelled, detailing when GM is included. We must consider allergies.

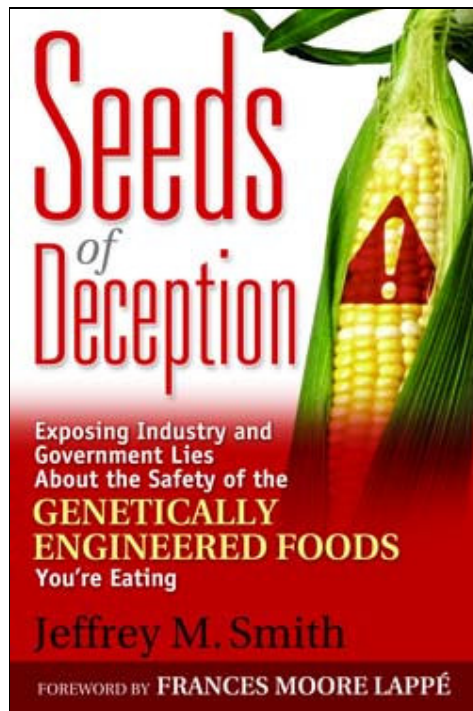

Why are the Farmer's Federations and the Gene Technology Regulator selling out on our farmers and kids?

Are people being paid off, or are they just ignorant?

Already over a hundred dead and thousands hospitalised in the US because of allergic reactions, all due to Genetically Engineered GE/GM Products. The Free Trade Agreement could force these food products onto our shelves **unlabelled**.

Monsanto's master plan expressed to Arthur Anderson Consulting Group in 1999 was to ensure that 100% of the entire world's commercial seeds would be genetically modified, patented and chemical dependent. Guess who will then own and control the world's food supply? (**Monsanto** is a giant US chemical company)

There is a plan to permit commercial planting of GM Canola in Victoria and New South Wales by the **1st May 2004**. This will permanently contaminate our clean food crops with genetically engineered pollen. As a result, we will eventually lose control of our food supply to a foreign power and Australia's clean and green status will be lost forever. ☹
